HAPPENS HERE

Speak naturally

PodPal listens in the background. No buttons, no prompts.

Research appears live

Facts, stats, follow-up questions — within 5 seconds of the topic shifting.

You look brilliant

Your guest has no idea. Your audience gets a better show.

THE PROBLEM

Great podcasters fly blind. Until now.

The best podcast conversations feel effortless. They're not. Behind every sharp follow-up is hours of prep. Behind every fact-check is a researcher. Most podcasters have neither.

HOW IT WORKS

Set up in 2 minutes.
Feels like a superpower.

FEATURES

Everything happening at once. None of it distracting.

"The best podcast hosts seem like they know everything. They don't. They just never get caught not knowing it. PodPal is how you get there."

★★★★★

"I used to spend 4 hours prepping every episode. Now I spend 20 minutes. And the conversations are better because I'm not worried about forgetting something — PodPal has my back."

— **Mic Mann** · Singularity South Africa Podcast

★★★★★

"A guest dropped a stat that sounded off. PodPal flagged it in seconds. I asked a follow-up question instead of just accepting it. Turned into the best moment of the episode."

— **Beta User** · Tech Podcast, 12K listeners

★★★★★

"The suggested questions panel alone is worth it. Three times per episode I've asked something that came from PodPal and the guest said it was the best question they'd ever been asked."

— **Beta User** · Business Podcast, 8K listeners
